Ethical Value

International Cooperation

Global Partnership

The National University of Management (NUM) believes that partnerships are essential to realizing our long-term vision to become a leading research university in advancing entrepreneurship and innovation. In that sense, NUM has been working effectively to co-operate with domestic and international higher educational institutions, corporations, and organizations. We always look forward to exchanging knowledge and human resources with public and private entities in order to achieve outstanding results together.

Global Learning

Given our commitment to partnerships, NUM has established strong connections with domestic and international entities to provide opportunities for our students, faculty, and staff. These opportunities include seminars, training, internships, exchange programs, and visiting professors and lecturers. As a result, a large number of our students have gone abroad to participate in seminars and exchange programs at our partner institutions. In addition, partners have always been welcomed to join academic and research activities hosted by NUM here in Cambodia.

Our Vision and Mission

Our Vision

Leading Research University

This vision stresses the importance of our university's key mission which is to improve and apply the best quality standards in education, research, and innovation.

The Strategic Plan 2019-2023 expresses the university's strong commitment to transform the National University of Management to be the leading research university in entrepreneurship and innovation. We look forward to working closely with relevant stakeholders to help realise our strategic vision, mission, and objectives over the next three years. Meanwhile, we welcome the active participation and support from our alumni, students, and private sector in the overall reform process. We do hope that NUM will become a globally ranked university in the near future.

Our Mission

Cultivate Innovative Leaders, Managers, and Entrepreneurs for Society.

The National University of Management is firmly committed to the development of competent and socially responsible human resources with high intellectual knowledge, skills, and ethics in order to be able to make more productive contribution to the socio-economic development of the country.

Our History

1983-1989

Historically, NUM was originally founded in 1983 as the Economic Institute. The Economic Institute offered a bachelor program in economic fields which specialized in commerce, agriculture, industry, finance, and planning. However, the Economic Institute was renamed to Institute of Economic Science (IES) in 1989. The IES provided academic major fields in economics and commerce.

1994-1998

In response to political and economic reform towards democracy and free market, IES was renamed to Faculty of Business (FOB) in 1994. It launched academic programs in management, marketing, accounting, and finance. Four years later, FOB was renamed to the National Institute of Management (NIM) and the first private tuition programs were introduced in 1998.

2004-2005

In 2004, the academic role of NIM was broadly expanded and then became the National University of Management. Soon afterward, NUM was accredited to full status as a public non-profit administration in 2005.

Up until 2015, the National University of Management was comprised of seven academic faculties and departments, and a graduate school that offered post-graduate programs including master's degrees and doctoral programs.

2016-PRESENT

In 2016, an International College which was located inside the National University of Management was established. It offers two academic programs which are International Business (IBBA) and Global Entrepreneurship & Innovation.

In addition, three new international academic programs were introduced in 2020 in order to respond to the human capital's emerging need for the development of industry 4.0 in Cambodia.

Message from Rector

On behalf of the National University of Management, I would like to express my sincere thanks to the Royal Government of Cambodia, Ministry of Education Youth and Sport, Ministry of Health, and the World Health Organization, that have worked tirelessly to protect and prevent the spread of the COVID 19 pandemic to our Cambodian community. In these challenging times, my colleagues and I are sincerely committed to working closely with students, faculty, staff, and collaborative partners to find innovative ways to offer greater flexibility for the learning experience via a new path of online/remote learning and hybrid classrooms with small in-person seminars and tutorials following SOP requirements.

With best wishes to you and good health in these challenging times!

Student Mobility

We believe that students mobility provides great benefits in terms of cultural understanding and communication as well as a sense of diversity that our students might experience from joining exchange programs and activities abroad. The International College at the National University of Management has been a catalyst to provide our 181 students opportunities to explore different cultures across the world including France, Singapore, Japan, Malaysia, Indonesia, Thailand, China, Poland, South Korea, Lithuania, United Kingdom, India, Vietnam, Slovakia, Spain, Hong Kong and Macau SARs, Myanmar, Belgium, Portugal, and the Philippines.

Entrepreneurial Spirit

At NUM, we cultivate entrepreneurial spirit in every students whose goals are beyond business and value creation but making positive impact to the livelihood of communities. Our approach lies on providing supportive means and encouragement to students to continue self-exploration and pursue their passion whether through joining competition or undertaking impactful passion-driven projects.

Ethical Value & Social Responsibility

Our students are equipped with both moral value and a sense of high responsibility. We believe that their actions as students in the present time shall determine their conduct in the future as professionals, corporate managers, enterprise leaders, and change-makers. The contribution that they make will generate a positive impact society and respective community of their profession.

National Programs

The National University of Management offers accredited bachelor's degree programs taught in Khmer with a variety of subjects ranging from management, economics, accounting, tourism, law to robotic engineering. In addition, a bachelor's degree program in the English Language is also available here at NUM

Our four-year bachelor's degree programs are structured into 8 semesters. The curriculum is semester credit-based, which means students will take at least five classes and must obtain 15 credits per semester. However, in order to receive a bachelor's degree, students are required to complete 120 credits of course work during their period of study.

Our National Programs are provided by 7 faculties:

1. Faculty of Economics
2. Faculty of Finance and Accounting
3. Faculty of Foreign Languages
4. Faculty of Information Technology
5. Faculty of Law
6. Faculty of Management
7. Faculty of Tourism and Hospitality

Faculty of Economics

Overview

The Faculty of Economics provides students with conceptual and practical knowledge with high competencies in the field of business economics and economics for development.

Students are equipped with a strong foundation of microeconomics and macroeconomics that are central to analyzing human decision-making and the interaction of individuals in particular economic systems. In addition, students will be exposed to sound knowledge and understanding of broad social, political, business, and economic phenomena.

Our graduates are expected to possess competent analytical skills to perform their research and decision-making as well as utilize their knowledge in socially beneficial pursuits.

Business Economics
Economics for Development

Testimonials

Mr. PHOR Lihav
Freshman, Economics

The National University of Management is like the second home for me, where I continue my studies after high school. It's like a comfort zone for me to gain knowledge and make new friends from all around the world, as well as interact with all of the experienced professors. Furthermore, mastering economics skills would undoubtedly assist me in achieving my aim of becoming a businessman. I have gained not just theoretical knowledge, but also real-world practical abilities. I am grateful to all the professors in the Faculty of Economics at the National University of Management for their time and effort in sharing insightful knowledge with us. Finally, I am thrilled to be a student of economics at the National University of Management.

Faculty of Finance and Accounting

Overview

The Faculty of Finance and Accounting at the National University of Management has a long history of offering academic programs in Cambodia in the fields of accounting, finance, and banking.

We provide an integrated curriculum that is responsive to professional and market needs including Corporate Finance, Financial Management, Cambodian Accounting Standards, Taxation, Insurance, Security Market, and so on. In addition, our experienced lecturers come from expert and business communities in Cambodia to offer best practices and real-world case studies to develop students' understanding of the financial and banking sector in the country and beyond.

Areas of Study

- Accounting
- Accounting and Taxation
- Accounting and Auditing
- Finance and Banking
- Finance and Insurance
- Finance and Security Market

Testimonials

Ms. Lim Chhayny
Junior, Finance and Banking

I am currently taking a bachelor's degree program majoring in Finance and Banking at NUM. At NUM, I receive extensive knowledge from experienced lecturers who are also professionals in the field. I believe my specialization in Finance and Banking will guide me to a successful career path in the demanding market of Cambodia.

Faculty of Foreign Languages

Overview

The four-year bachelor's degree program at the Department of English is designed for high school graduates and working adults to meet the needs of the market demand for university graduates with English skills that will help them adapt to changing economic situations.

The development of our curriculum is also carried out by taking into account social and cultural changes in today's world. Our philosophy is to produce graduates with great ability and understanding in English and in other related fields, who possess skills in learning, analyzing, synthesizing, critiquing, and conducting research, and who serve as efficient human resources of knowledge whose potentials can be tapped.

Areas of Study

English Language

Testimonials

Ms. Neun Chetra
Junior, English Language

I can say that when I studied at the National University of Management, I felt very welcoming. Although I have been learning online for a while, my teachers and professors have always encouraged me and paid close attention to all students. In addition, the National University of Management has given me opportunities to participate in many exchange programs to challenge myself and learn various knowledge that allows me to apply the skills in which I am learning. In fact, I even participated in a virtual exchange program with students from Singapore through an online system, which gave me new knowledge and self-development. In short, the National University of Management has brought many programs for students to learn and challenge themselves. Personally, I really enjoy studying here as it challenges me to be a better person and student.

Faculty of Information Technology

Overview

The Faculty of Information Technology offers bachelor's degree programs that equip students with a strong foundation in quantitative methods, programming, and technology, including database management, operating systems, networks, and internet essentials, and organizational knowledge and tools necessary to apply information technology across every organization, level, and domain.

The programs also provide an in-depth introduction to a variety of career-focused specialty areas including Web and Media Design, Database Management System, Software Development, Network Security, and Administration. Our graduates will acquire competent skills in programming, system analysis, and software skills required to pursue a career in information technology, robotic engineering, and be able to be involved in entrepreneurial technology.

Areas of Study

Robotic Engineering

Testimonials

Mr. Thuol Sokhunraksmeay
Senior, Information Technology

I have met many distinguished professors and experienced excellent study programs. Moreover, the faculties members are very approachable, helpful, and supportive. They are good academic advisors, career counselors, and of course, real-life advisors as well. Most classmates are very knowledgeable since they have had a wide range of experience in work settings. On top of that, they are very helpful and open-minded, which brings about good and unforgettable memories for me. Personally, taking a Bachelor's degree student at the National University of Management makes me delighted, and I can see clearly about the better change of my personality, knowledge, and skills. I believe that only education can bring us real freedom.

Faculty of Law

Overview

The Faculty of Law offers a bachelor's degree program in law. This program is designed to provide students with an insightful understanding of the concepts, principles, policies, and values of laws both in the Cambodian legal system and international jurisdictions.

We encourage students to join international competitions as well as mock trial competitions so that they have opportunities to develop outstanding skills in critical analysis and advocacy. In addition, the Faculty of Law offers students a wide range of elective courses and extra-curricular activities that provide opportunities for students to put the knowledge they have acquired in class into practical context and enhance transferable skills such as advocacy and negotiation.

Areas of Study

Law

Testimonials

Ms. Yuth Thariya
Junior, Law

NUM is the bridge that brings me to my dreams. It is a place that has given me knowledge, friendship, and communication. In particular, at NUM there are professional professors with full knowledge and experience, especially the teaching method is very good, which allows students to adapt quickly. One more thing, the school has enough educational material and training facilities. I have always believed in NUM and my future will be improving. Thank you, NUM!

Faculty of Management

Overview

The Faculty of Management offers standardized academic programs that aim to nurture and develop the entrepreneurial spirit in students and build a strong foundation of practical and enhanced skills in management, marketing, and entrepreneurship. Our graduates are expected to possess a competent ability to manage different departments in a company or organization and be able to run their own business successfully with professional communication skills and innovation.

Areas of Study

Management
Marketing
Entrepreneurship

Testimonials

Ms. Phien Reaksa
Junior, Management

I am grateful to have the opportunity to study with lecturers who are both supportive and attentive in helping students to unleash their potential. I am confident that my major in management is not only a demanding skill but it is essential for students who expect to get a sense of self-confidence and responsibility along with solid knowledge and skills.

Faculty of Tourism and Hospitality

Overview

As the tourism, hospitality, and event (THE) industry continues to grow and mature, the knowledge and skills required of those in management positions have become more sophisticated.

The Faculty of Tourism and Hospitality offers bachelor's degree programs in tourism and hospitality where students will gain three managerial skills in tourism, hospitality, and event planning.

Students are expected to acquire the knowledge and expertise to assume ever more responsible career positions in an evolving industry. In addition, our graduates will furnish the managerial talent needed by hotels, resorts, governmental agencies, destination management firms, and corporate travel companies.

Areas of Study

Tourism
Hospitality

Testimonials

Ms. Chan Dalin
Senior, Tourism and Hospitality

I currently study Tourism and Hospitality at the National University of Management from where I obtained extensive knowledge of tourism development and hospitality delivered by experienced professors and lecturers who are also professionals in this field. I believe tourism is a potential sector contributing to the development of Cambodia's economy as well as a demanding sector for skillful labor which I believe is a doorstep for my future career.

International Programs

The National University of Management launched a new international bachelor's degree program in International Business (iBBA) in 2011. This program aimed to provide quality English-based instruction in business administration and management by experienced academic and professional faculty. This program has progressively developed with support from our partnerships with international universities in Asia, Europe, and North America as well as with our international corporate partners.

This international program has evolved to become NUM International College in 2017 with the addition of new undergraduate majors. In 2018, a new undergraduate major in Global Entrepreneurship & Innovation was introduced in addition to a new Master's degree program (MBA) in Global Innovation Management. These programs are supported by NUM Social Innovation Lab which was founded in 2017 via an EU Erasmus Grant.

In addition to NUM International College, the National University of Management has also introduced additional international bachelor's degree programs taught in English including a new Faculty of Digital Economy, which includes areas of specialization such as Digital Economy, Financial Technology (FinTech), and Smart-city Planning Management. A new English-based international law program has also been created. These successful program introductions are consistent with the university's commitment to internationalizing its curricula and program offerings to meet the need of the 21st-century global economy.

Faculty of Digital Economy

The introduction Faculty of Digital Economy, which was initiated by H.E. Dr. Hang Chuon Naron, Minister of the Ministry of Education Youth and Sport, is at the right time as the Royal Government of Cambodia sets out a long-term vision, through "Cambodia Digital Economy and Society Policy Framework 2021-2035", to build a vibrant digital economy and society by laying the foundations for promoting digital adoption and transformation in all sectors of society – the state, citizens, and businesses – to promote new economic growth and improve social welfare in the "new normal".

The COVID-19 outbreak, which hit every corner of the world since late 2020, has boosted the demand for digital technology to overcome issues that the pandemic has brought along. This has a profound impact and implication on the labor market and makes digital economy skills even more crucial for younger generation who will become the human capital for Cambodia and for anywhere else in the region and the world.

Taught by both experienced national and international professors and world-class experts from NUM's university partner network from around the world, the faculty offers three international English-based programs – Digital Economy, Financial Technology and Smart City Planning Management. The three programs will not only support the Royal Government of Cambodia to achieve the "digital transformation" to turn Cambodia economy and society to a higher level of development, but also responds to the human capital's emerging need for the development of industry 4.0 in Cambodia and align with the regional and global trends.

Graduates of the Digital Economy Programs are to be equipped with both digital knowledge and digital technology and innovative ideas to solve real-world socio-economic problems.

Bachelor's Degree

Digital Economy

Financial Technology

Smart-city Planning
Management

Areas of Study

1 Digital Economy

The bachelor's degree program in digital economy aims to produce qualified graduates to guide businesses and consumers to understand the potential benefits of the digital economy. More specifically, it aims to provide a critical overview of digital economic practices and models, with a specific focus on key concepts and theories required to understand the changes brought about by digitalization in the cultural industries and in the audiences. Organizations in development need economists holding digital competence. Successful graduates from this program can find work in a huge variety of areas, from government units to business companies and industries. Some of these job opportunities include economist, data scientist, business analyst, IT consultant and project coordinator etc.

2 Financial Technology

This program is designed to nurture financial technologists and entrepreneurs with essential knowledge in both finance and technology so that they can take leading roles in innovation and applications of financial technology. This program prepares students with knowledge that allows them to have a broad career pathway as they could take up positions in the Fintech industry, finance, and IT industries. The entry-level position for graduates includes, but not limited to financial analyst, investment banking analyst, product manager, data analyst, and data analyst.

3 Smart-city Planning Management

This program is designed to develop skills that align with global and national initiatives towards smart cities. Graduates are expected to have the ability to innovate solutions to urbanization challenges through application of interdisciplinary knowledge across technology, social sciences and public management.

The program will prepare students for a wide variety of job roles including IT or management consultants for smart systems, sustainable solutions designer, urban planner, as well as smart systems designer and developer.

Faculty of Digital Economy

Supporting Facilities

Digital Economy Lab

Digital Economy Lab is equipped with various technological equipment including a widescreen monitor, overhead projector, all-in-one touch screen computer, 3-dimensional printers, and dedicated high-speed Wi-Fi connection, is employed so that students can learn and practice adequately for their perspective employment.

Various technological equipment is employed so that students can learn and practice adequately for their prospective employment and NUM become a forefront practical learning university in their new fields. A smart classroom is a ramped-up mode of education which, instead of taking away from education or the attention span of students, adds opportunities to the existing traditional classroom setup. The smart classroom allows a hybrid mode learning which allows students to be able to learn in the real classroom or via online from anywhere. This significantly guarantees a safe learning environment for students during the pandemic.

Testimonials

Ms. Heng Malinet

Freshman, Smart-City Planning Management

I feel delighted to have enrolled in this newly established program. Smart city has received great attention as it is a response to global warming, urban issues and future basic industries. The subjects offered by this program concern data analytics, solution development skills and business and social implications of smart city innovations. It really does capture my interest. To me this program is a key that unlocks the door to the technologically advanced world. I find myself enjoying the diversity of the classroom and facilities and I truly appreciate the efforts of all the lecturers and professors. This will be the greatest journey ever.

Mr. Hok Chetra

Freshman, Digital Economy

I will never be able to adequately pay my gratitude and appreciation to the National University of Management for presenting the newest major in Cambodia. I am immensely encouraged and awestruck by the faculty's unwavering support and all of the national and international academics who have always gone above and beyond in assisting and leading me toward my future professional path. I am now able to fully realize my potential throughout the entire year of pursuing this degree thanks to clever learning platforms and excellent teaching capabilities.

NUM International College

Bachelor's Degree

International Business
(iBBA)

Global Entrepreneurship &
Innovation

International Bachelor of Laws
Program (iLLB)

Master of Business Administration in Global Innovation Management

NUM International College or NUM-IC, located at the National University of Management, offers English-based majors which aim to provide students with essential knowledge and skills to prepare them to live and work in dynamic cultures and globalized business environments.

We offer three undergraduate programs: International Business, Global Entrepreneurship & Innovation, and International Law. We also offer a Master's degree program in "Global Innovation Management." At NUM International College, students are taught in English by both international and local professors and lecturers who have graduated from abroad with experiential learning and action-oriented instruction.

Students admitted into the program will take part in the college's Foundation Year/Year One program, to gain general knowledge and basic understanding of the program courses. After completing the foundation year, students will have the opportunity to choose one of the following majors: International Business or Global Entrepreneurship & Innovation. The International Law program has its own Foundation Year program.

International College

1 International Business (iBBA)

This is an English-based program, the theory and practice are to be provided during the class sessions. Our aim is to cultivate an inquisitive mind and a scientific methodological approach to problem-solving. Students are provided with a detailed understanding of the international business framework within which the firm operates as well as how domestic and internal economic, political, legal, technological, and societal factors affect the business decision-making process.

Upon graduation, the student is ready to work in an international environment where globalization is part of life. This includes entry-level positions in the industry and services sectors. Likely areas for employment include:

- Any local organization that engages in exports or overseas investments.
- Any local organization for which the management of its relationships with foreign suppliers or buyers constitutes a critical function.
- Large, multinational corporations whose operations in countries and regions of interest to students
- Management consulting organizations.
- The private sector, such as Financial Institutions and Production Firms.

2 Global Entrepreneurship & Innovation

The Bachelor's degree in Global Entrepreneurship & Innovation is an interdisciplinary program that provides the essential skills for success in any business endeavor, be it a startup, social enterprise, international company, or global organization.

Students will learn leadership skills and how to build effective teams to deliver value to organizations in terms of launching new products and services, improving organizational systems and processes, and developing new innovative business models.

The program will utilize experiential and project-based learning methodologies. Students in the program will develop an entrepreneurial and innovative mindset, which is essential for success in the 21st-century global economy.

Focus: Startup, Creativity & Innovation, Entrepreneurial Mindset, Leadership, Design Thinking.

International College

3 International Bachelor of Laws Program (iLLB)

International Bachelor of Laws Program (iLLB) was established under the leadership of His Excellency Dr. Hor Peng, Rector of the National University of Management. iLLB aims to promote legal education in Cambodia that addresses emerging issues in the currently recognized as a unique legal education program in Cambodia for its innovative approaches. Participation in moot competitions is required since students' entry, as can be found in our curriculum, to be one of our core activities. It allows students to strengthen their capacity faster through their actions in moot competitions as prosecutors, lawyers, or other legal practitioners, and their involvement in solving hypothetical international dispute cases. Throughout the moot competition, students will also be able to figure out their interest areas of law that will later benefit their future professional legal career and society.

By combining academic study, internships, and moot court competitions, iLLB students gain academic legal knowledge and also practical skills for life beyond university. This rigorous legal training is provided in an intimate and friendly environment, enabling students to express themselves openly and to use their talents across a diverse array of fields.

MBA in Global Innovation Management

The MBA in Global Innovation Management is an accelerated, executive master's program with a duration of 18 months. Courses are taught by experienced professionals and startup entrepreneurs during evening weekday sessions. The business program includes marketing, design thinking, finance, human resource management and leadership - all taught through the lens of innovation.

As part of their global experience, all students are required to join a 10-days visit to San Francisco/Silicon Valley where the class will visit leading innovative companies such as Google, Youtube, Airbnb, the design firm IDEO, the management consulting firm McKinsey & Company in addition to attending workshops at the Haas School of Business at UC Berkeley and a visit to Stanford University.

School of Graduate Studies

Our Vision

Our Vision is to be the leading graduate school in Cambodia and internationally recognized for excellence in academics. We seek to be the national leading graduate school in Cambodia by achieving the highest quality standards of education, research & innovation and services.

Our Mission

Our Mission is committed to the development of human capital for society. We provide advanced knowledge to our graduate students through innovative curriculum linkages, new teaching methodology, high standard classrooms, and high qualified academic staff. We will transform our graduates to be competent and socially responsible managers, leaders, and entrepreneurs.

Our Values

Quality: is our top priority, we share the value of high quality of teaching, research, and services.

Innovation: we will always encourage faculty and students to actively participate in research and innovation.

Cooperation: we work with faculty members, students, alumni, and external partners to support our academic excellence.

Integrity: we will be truthful, equitable, and committed to intellectual honesty.

Master Degree Programs

Overview

Master programs offered by the School of Graduate Studies at the National University of Management consists of Master of Business Administration (MBA): Management, Marketing, International Business, Global Innovation Management, and Business Law; Master of Sciences (MSc): Economics, Finance, Accounting, Bank Management, Tourism and Hospitality, Information Technology, Management of Technology, Logistics & Supply Chain Management, and Environmental Management; and Master of Public Administration (MPA) and Master of Public Policy (MPP). All master students are required to complete 48 credit hours comprising of 12 credits for basic courses, 15 credits for major courses, 9 credits for elective courses, and 12 credits for Option 1: three comprehensive exam courses with a research paper/report; Option 2: two comprehensive exam courses with a project; Option 3: research thesis.

Program Objectives

1. To prepare graduate students for management and leadership in public and private sectors;
2. To provide graduate students with the managerial skills necessary to make and implement decisions and to develop the student's ability to work effectively with others;
3. To equip graduate students for applying real-world management and leadership;
4. To stimulate receptiveness to new ideas and new ways of approaching problems, and to meet the challenges and demands of management and business in the future.

Admission Requirements

Applicants for the master programs must possess:

1. A Bachelor's degree with honors or its equivalent from any university recognized by the Ministry of Education Youth and Sport; or
2. A Bachelor's degree and at least three years continuous working experience at post-degree level; or
3. To other equivalent qualifications recognized by the Ministry of Education Youth and Sport
4. All applicants must pass an entrance examination with at least two courses: English and major course.

Master of Business Administration (MBA)

MBA in Management

MBA in Management is designed to provide students with the managerial skills necessary to make and implement decision-making for the organization. By the end of the program, students will be able to integrate tools and concepts from multiple functional areas to solve business problems and to demonstrate the ability to perform as management professionals. Students are also able to excel in their chosen career paths, by learning how to live, to adapt and manage business environmental change.

MBA in Marketing

MBA in Marketing is designed to provide a broad foundation in marketing concepts, and practices in the contemporary context. By the end of this program, students will be able to develop and implement integrated marketing programs, work closely with managers in other functional areas, and make marketing decisions that facilitate the organization in achieving its objectives.

MBA in International Business

MBA in International Business is designed to provide a unique opportunity for graduate business students to develop skills in international business collaboration and global business operations. By the end of this program, students will be able to evaluate business issues from a transnational perspective, integrating multiple business disciplines, work more effectively with others, analyze international business situations and anticipate future trends, and cope proactively with the volatility of the global business environment and create value through proactive networking in international contexts.

Master Degree Programs

MBA in Global Innovation Management

MBA in Global Innovation Management is designed for young startup entrepreneurs and working professionals from both the public and private sectors. The program includes all of the main business management subject areas (e.g. finance, marketing, human resources, operations, etc.) though taught through the lens of innovation. The overall aim is to create graduates who are more creative and innovative, with the expectation that they will return to their companies and organizations and help lead innovation initiatives such as the launching of new products, services, processes, and in certain cases startup businesses. This English-based program is offered in partnership with NUM International College.

MBA in Business Law

MBA in Business Law is designed to provide business students with thorough and advanced knowledge in legislative issues that are of particular importance to companies and governmental agencies that keep an eye on how companies behave. By the end of this program, students will be able to understand and analyze a wide range of legal problems that arise in business, to understand a broad range of roles in the private, commercial and governmental sectors where legal literacy and skills are increasingly important.

Master of Science

Master of Science in Economics

MSc. in Economics is designed to provide a sound theoretical background in the principles of economics and equip students with analytical tools and techniques for understanding the evolution of the world economy. By the end of this program, students will be able to apply economic analysis to everyday problems in real-world situations, solve problems that have clear solutions, use statistical methodology, and analyze relevant economic models.

Master of Science in Finance

MSc. in Finance is designed to develop a broad understanding of the financial aspects and provide fundamental tools of financial analysis and decision-making. By the end of this program, students will be able to apply economic analysis to the firm's decision-making, to evaluate and explain financial decisions regarding the firm's investment and long-and short-term financing strategies by applying financial theory and quantitative analysis methods.

Master of Science in Bank Management

MSc. in Bank Management is designed for senior-level banking management as well as students who acquire knowledge and develop skills and abilities necessary to lead and manage banks, within a focused and structured environment. After successful completion of this program, students will have knowledge and understanding of the different types of risks and banks face and how to measure them, knowledge of the economic roles and banking structures, and understanding of company financial statements.

Master of Science in Accounting

The MSc. in Accounting is designed to develop highly competent accountants who are knowledgeable in financial processes and procedures and fully prepared for entry into the demanding accounting profession, one of the fastest-growing industries. By the end of the program, students are well equipped with appropriate professional skills in accounting to successfully obtain employment in accounting firms, companies and public agencies.

Master of Science in Tourism and Hospitality

The MSc. in Tourism & Hospitality is designed to develop advanced professionals in the field of tourism, hospitality, and commercial recreation management. After successful completion of this program, students will be able to interpret practical, theoretical, and personal skills required for senior management roles within a variety of international hotel and tourism organizations. Students are also able to synthesize strategic, organizational, and marketing processes of a commercial hospitality enterprise within the context of the global nature of the business.

Master Degree Programs

Master of Science in Information Technology

The MSc. in Information Technology is designed to provide competent graduates that meet the IT needs of the business world. The program will equip students to deal with major organizational information systems challenges such as assessing information needed at different levels within an organization, designing systems, creating information systems architecture that aligns with the goals and mission of the organization.

Master of Science in Management of Technology

The MSc. in Management of Technology is designed for students who want to process a strong scientific or technological background, recognize the importance of developing knowledge to facilitate the transfer of technical and scientific into innovations that impact the competitive marketplace. By the end of this program, students will be able to identify and evaluate the impact of relevant changing technology and manage those changes, students are also able to manage the effective planning and execution of those technology-based initiatives and the integration of their results into the mainstream of an enterprise's strategy, processes, and operations.

Master of Science in Logistics and Supply Chain Management

The MSc in Logistics and Supply Chain Management is designed for students who seek to gain the skills to work at the operational to the strategic level. By the end of this program, students will enhance their leadership careers in the field of logistics and supply chain management. The knowledge of logistics and supply chain management may include inventory, transportation, warehousing, location, reverse and green logistics, and customer and supplier relationships. Students will complete 48 credit hours comprising of 36 credits for basic core courses, major courses, and elective courses and 12 credits for integrative courses and research paper or project or thesis.

Master of Science in Environmental Management

The MSc. in Environmental Management is designed to provide students with the tools and techniques to navigate the business aspects of environmental management. After successful completion of this program, students will be able to assess and convey the business, ethical and legal information to those who make or are affected by the decisions that shape our natural resources and environment.

Master of Public Administration

Master of Public Administration is designed for students who are interested in public service careers including state or local government, city management, and urban planning, non-profit organizations, and government relations work in private firms. By the end of this program, students will become professionals who are knowledgeable in the theories, principles, and practices of administration and who can apply their skills in a variety of organizational settings, especially within governmental settings.

Master of Public Policy

Master in Public Policy is designed to provide students with a solid foundation in economics, politics, and research methods as applied to policy analysis. By the end of this program, students will be able to define policy issues to make them more intelligible to officials in the public or private sector, providing a broader perspective for assessing policy alternatives, examining techniques for developing policy options and evaluating their social consequences, and developing strategies for the successful implementation of public policies.

Doctoral Degree Programs

Admission Requirements

To be admitted into the Ph.D. or DBA programs at the National University of Management, students must possess:

1. a master's degree with a good qualification in research;
2. an official master's transcript;
3. a completed application form with two letters of recommendation;
4. a summary of curriculum vitae with work experiences;
5. an evidence of proficiency in the use of English language;
6. an evidence of proficiency in the use of information technology; and
7. a preliminary research proposal with 5 to 10 pages.

Doctor of Philosophy (Ph.D.)

The program is designed to advance human resource development in Cambodia and achieve a high level of academic instruction in a major field that meets regional and global standards. This program enables students to complete an extensive, independent research project under the supervision of an expert academic. When completed this research should make a valuable contribution to the current body of knowledge on a chosen topic. Ph.D. students are required to complete a minimum of 54 credits (21 credits of course works and 33 credits of research works) with a minimum grade of B+. The minimum period for full-time study is six (6) semesters and the maximum is twelve (12) semesters and sixteen (16) semesters for part-time study.

Doctor of Business Administration (DBA)

The DBA Program normally requires three years of intensive study beyond the master's degree. The program focuses on developing competent scholars, heavy emphasis is placed on the development of both teaching and researching skills. The program seeks to educate future management researchers and teachers who generate new knowledge to advance understanding of their major fields and improve management practice by teaching excellence and creating innovative educational strategies. DBA students are required to complete a minimum of 54 credits (27 credits of course work and 27 credits of research work) with a minimum grade of B+. The minimum period for full-time study is six (6) semesters and the maximum is twelve (12) semesters and sixteen (16) semesters for part-time study.

Our Doctoral Programs at the National University of Management does not only offer credible education to domestic candidates but also foreign students who wish to pursue their post-graduate degree in Cambodia. As a result, students from Bangladesh, India, Indonesia, Taiwan, Bulgaria, and the Philippines have chosen to study with us.

NUM Research Center

Overview

The NUM Research Center was established as a result of the commitment of the National University of Management to develop research activities and the financial support of the World Bank. Founded in 2013, the NUM Research Center aims to promote the process of scientific research and the publishing activities of all academicians and researchers from faculties of the National University of Management. NUM Research Center provides potential researchers and lecturers with the research grant to conduct their research, following a competitive selection process.

What We Do

- Research activities with faculty curriculum
- Joint research activities with university partners
- Organize academic research competition
- Provide certificate programs
- Implement research projects

NUM Research Center

We are experienced in leading local, regional, and international projects

- World Bank, HEQCIP (2013-2015)
- Student Research Competition (2015-2018)
- ADB Essay Competition (2016)
- SEASIN (2016-2019)
- DOCKSIDE (2016-2019)
- Legal Thinking Through Civil Law (2017)
- WANASEA (2017-2020)
- ADB Regional Training in Project Management (2018)
- BALANCE Project (2018-2021)
- GREENCAP (Ongoing)
- FAB (Ongoing)

WANASEA

Southeast Asian
Social Innovation Network

Our flagship academic journal, NUM Research Series

NUM is committed to producing high quality research outputs which we believe plays a crucial role to contribute to generating intellectual resources for Cambodia's development. Our flagship journal covers a range of social science and applied economic research including economics and economic development, tourism, finance, entrepreneurship, law, and other disciplines.

ASEAN Economic Research Institute

វិទ្យាស្ថានស្រាវជ្រាវសេដ្ឋកិច្ចអាស៊ាន

ASEAN Economic Research Institute (AERI)

About Us

The National University of Management is honored to be selected by the Ministry of Education, Youth, and Sports to establish an institute to support academic research with a focus on economic issues and policy development in line with a particular focus on the establishment of the Asian Economic Community (AEC). The establishment of the ASEAN Economic Research Institute confirms NUM's commitment to enhance and encourage research among faculties in the area of economic strategy and policy. The initial impetus for this project comes from Cambodia's chairmanship in the Chair of ASEAN in 2022 and it is expected that research will be initially driven by the theme and direction of Cambodia's chairmanship in continuing the development of AEC in line with the ASEAN Charter. Once established research will continue to explore the ongoing development to AEC Blueprint 2025 and beyond.

The aims and objectives of the AERI are to:

- Study economic development strategies of ASEAN member countries and provide inputs for Cambodian policy makers to enhance the competitiveness of the Cambodian economy
- Liaise with policy makers, the business community, and NGOs to identify priorities and areas of support as the development of AEC continues.
- Encourage close and beneficial cooperation with other educational and regional organizations within the ASEAN community.

NUM Social Innovation Lab

About Us

The NUM Social Innovation Lab is part of the EU funded South-East Asian Social Innovation Network (SEASIN) with additional support being provided by SMART Axiata. The Social Innovation Lab serves as both a space for seminars and interactive workshops on topics related to social innovation and entrepreneurship and also as an incubator to help develop and launch new social ventures. While the primary target is university students, the NUM Social Innovation Lab is also open to the wider social enterprise community. A maker space is also available within the Social Innovation Lab so that students and outside community members can work to develop physical prototypes via the use of 3D printers. The NUM Social Innovation Lab also serves as the main training venue for the National Business Model Competition (BMC) which is an annual entrepreneurship competition open to all university students in Cambodia. The National Business Model Competition is also affiliated with the regional Mekong Challenge, which was launched in 2006 in partnership with the international consulting firm McKinsey & Company, and also with the Business Model Competition Global in the U.S.

Virtual Reality

We also have Oculus Rift and Oculus Go to provide you with an experience of the virtual world.

Event Space

We offer a space to host interactive workshops and training seminars for up to 35 participants. The space is also idea for startup pitching sessions.

3D Printing

We also offer the service to print prototype products with our 3D printers, Ultimakers & UPBOX.

Internal Quality Assurance (IQA)

About Us

Internal Quality Assurance (IQA) Office is the core center with a main responsibility for creating a quality culture across the University to respond to the set quality standards, aiming at ensuring the sustainability and continuous improvement of its educational, research, and community services. It provides technical and administrative assistance to both academic and support units in practicing IQA so that NUM is ready for external quality assessment by the Accreditation Committee of Cambodia ACC, ASEAN University Network-Quality Assurance (AUN-QA), and other external assessment bodies. IQA Office also coordinates the process of NUM's applications for World Ranking, especially the World's Universities with Real Impacts (WURI).

Composing of qualified quality assurance practitioners and trainers, in 2021 IQA Office brought about the following main accomplishments for NUM family:

- NUM has become an Associate Member of AUN-QA,
- NUM has developed and is implementing a quality assurance project with Education Quality International and AUN namely NUM IQA and AUN-EQI CLM Community Project 2021-2026
- NUM was ranked in WURI 2021
 - Global Top 200 Innovative Universities
 - Top 26 for Entrepreneurial Spirit
 - Top 37 for Ethical Value and Social Responsibility, and
 - Top 33 for Crisis Management

**NUM-AUN-EQI

Digital Economy Lab

The Digital Economy Lab, which is part of the Centre for Excellence, was built under the sponsorship of the United Nations Development Programme (UNDP Cambodia). This lab is located on the first floor of building F, along with two other innovative classrooms, which serve as a practicable lab for digital economy students. This Digital Economy Lab is equipped with a widescreen monitor, overhead projector, all-in-one touch screen computers, 3-dimensional printers, and dedicated high-speed wifi connection. These modern facilities support our students to experience cutting-edge technology that is required for their study in the field of digital transformation.

SUNWAH Innovation Center

SUNWAH Innovation Centre, a project sponsored by the SUNWAH Group, is comprised of an Innovation Lab and Cultural Centre. The Innovation Lab is equipped with supporting facilities to assist students with their study and research in the field of innovation. The Cultural Centre, however, will serve as a host to cultural performances and displays from all around the world.

In addition, SUNWAH Innovation Centre offers scholarship programmes for students from the National University of Management to pursue their graduate studies in Jiangnan and Macao SAR, China.

Library

The Hun Sen Library is located inside the campus of the National University of Management, has been an essential provider of books, information, ideas, and educational support for all NUM students. The library brings together an extraordinary richness of resources and opportunities for students to practice self-study in a quiet yet refreshing environment.

The library consists of two parts, one of which is on the first floor of building D that gathers educational resources written in Khmer language including textbooks, Khmer literature, a collection of Cambodian legal code, student theses, and so on. Another part of the library which is located on the second floor offers a wide array of foreign resources including textbooks and subject-related literature written in English. In addition, a collection of Harvard Business Review, journals, and other resources from internationally recognized publishers are available.

Besides books, the library is equipped with a dedicated wifi connection, computers, television, and audio materials for students to do self-study and research. Students can also access an E-library system that will help find reading materials at their convenience.

Conference Hall (Auditorium)

Conference Hall B is located inside building B, has an auditorium layout that can accommodate up to 200 people. This conference room is equipped with modern facilities such as dedicated wifi connection, air conditioners, a sound system, and overhead projectors whose capacity is fit for various possible configurations including conferences, training courses, seminars, workshops, and other in-house events. In addition, there is adequate space for catering outside the conference room.

This facility also supports the university and students to conduct formal ceremonies and other extra-curricular activities such as performances, student orientation sessions, guest speaker events, and welcoming ceremonies, etc.

CAMPUS LIFE

In addition to academic activities, the National University of Management encourages students to participate in extra-curricular, cultural activities, and exchange programs both organized inside the University campus or outside in order to have them exposed to the outside world, exchanging thoughts, building friendship and community that leads to positive change.

Sangkran NUM

APR

The National University of Management hosted Sangkran NUM in 2019 to celebrate the Khmer New Year and provide opportunities for students to take a retreat before the start of their new semester.. Sangkran NUM allows students to experience cultural and traditional ceremonies and activities. In addition, students had opportunities to volunteer on the organising team and build friendships with one another.

BMC Application Opens

AUG

The Business Model Competition Cambodia, organized by NUM Social Innovation Lab, is a platform for young entrepreneurial spirits to put their entrepreneurial ideas into action. This competition allows students to test and validate their business ideas, make pivots and then present their business models to an experienced panel of judges. In addition, students involved in BMC have the opportunity to build networks with practitioners in various fields and especially professionals from the private sector.

DFL's Christmas Celebration

DEC

In December every year, the Department of Foreign Languages of the National University of Management organizes a Christmas Party for students to explore western culture and tradition of those who practice Christianity. This event allows students to know not only domestic and regional cultures but to embrace the value of one's tradition, religion, and culture.

Located at the center of the university campus, building A is the governing venue which consists of administrative offices on the ground floor. Students normally find building A to be an inspiring and well designed building.

The French-colony style hallway is considered one of the unique spots of NUM campus. The design of the pillars and tiled floor remains the same pattern as it was originally built in 1983.

NUM Green Park serves as a refreshing open space for NUM students to take a break between and after classes. This place is also popular for small group study sessions.

Besides classrooms, building F hosts the Digital Economy Lab and the NUM Research Center where interdisciplinary research activities occur.

Campus Tour | Corner Monivong Boulevard

The leading research university campus at the center of the Capital of Cambodia.

Two modern cafeterias located on the top of Circle-K, serve our students, faculty and staff with breakfast, lunch and coffee.

Robotic Lab is designed to support our IT students with their mechanical practice

Circle-K has arrived at NUM campus to serve our students and staff for 24/7.

Modern classrooms being implemented gradually within the campus.

NUM Satellite Campus (Under Construction)

LET'S HEAR FROM OUR ALUMNI

Studying at NUM has provided theoretical and practical knowledge. Furthermore, NUM has provided me a great opportunity to sharpen my skills in my field and unconditional experiences from every corner. Most importantly, I have studied with many high qualified professors who always share and inspire me to achieve my dream. I am privileged to be a part of NUM students and I would like to express my gratitude towards NUM, for being my strongest education background.

Mr. HENG Mengsophonith
FFL Alumni

In the blink of an eye, my four years at NUM had come to an end. I have learned only insightful knowledge, but also practical knowledge as well. Moreover, I have put my theoretical knowledge to practice by writing my thesis by the second semester of my senior year which helps me enhance my critical, problem solving, and researching skills. I would like to show my appreciation to all lecturers in the Faculty in Economics for directing and giving advice and providing me that valuable learning experiences to help me reach my goal.

Mss. VOEUN Vibolsreyleak
Economics Alumni

As a provincial student, I'd like to express my appreciation to all lecturers and classmates for their warm welcome and encouragement. Throughout my university experience, I gained valuable experience from local and international programs that will serve me well throughout my life. I cherish the moment. "Study hard and Play hard." is the phrase I used for class activities. Congratulations, Class of 2021!

Mss. LAO Eanghun
Economics Alumni

Starting from a normal student who doesn't know the outside society at all just trying to study hard only to pass BacII Exam. Until the end of high school, i almost don't know what to study but as a result when stepping into the National University of Management for the first time and decided to study Economic Business as I wished to be a business man in the future made me feel like there were so many things I had never encountered waiting for me on my college students life path. All I have learn in NUM have both theory and practice from teachers and professors, which made me become an outstanding student and write my research thesis completely with what I have learned from the professors during these 4 years. I can hardly believe that I can graduated under the name of Outstanding Student (Top 10). Thank you to all the teachers and professors who have trained and given everything you have to all the students who are the successors of the bamboo vine. Finally !!! nothing but only, I wish you all the best, Dear teachers may got bless you all happiness, prosperity and success in all tasks you are doing. Good Luck all teacher and professors !!!

Mr. KUY Techkong
Economics Alumni

I feel so proud of myself that currently, I can use all of the pieces of knowledge and skill learned at NUM to practice in my daily work. I know most students are obsessed when choosing a college major. However, what pushed me to choose this major rested on my self-interest. Choose what you like, not the other's favorite. Management teaches you to understand how people behave in organizations, and the nature of power, influence, and leadership. Whether you aim to be a business owner, entrepreneur, or employee, I would say that Management will give you the tools for success! Highly recommend to all the next generation to choose this university and catch up on your favorite major here to grow your knowledge and skills.

Mr. PAK Ravy
Management Alumni

I recently received my bachelor's degree in Business Economics from the National University of Management (NUM). Studying Business Economics at NUM is the right decision because NUM provides an excellent academic curriculum, has considerable experienced business economics professors, and offers a reasonable tuition fee. Personally, I have gained a deeper understanding of economic theories and techniques that can be used to develop government policies, as well as how to create efficiency in today's business environment. Meanwhile, studying Business Economics at NUM has helped me acquire a variety of transferable abilities, including communication, problem solving, decision making, research, numeracy, and time management. Finally, based on my experience as a business economics graduate, I believe that this degree at NUM helps prepare students to work in a variety of areas, including banking, finance, accounting, business, government, non-governmental organizations (NGOs), consulting, and education.

Mr. PUM Mengkorn
Economics Alumni

I am proud to be an alumna of the National University of Management. My major was in Management which provided me with essential skills and knowledge for self-development as well as competencies that enable me to run my own business. In addition, I learned cross-cultural communication which I can apply to build relation with business partners.

Mrs. CHHOUR Kimsoung
Management Alumni

I chose to study management at NUM because I believe this major would provide me with the abilities and competencies, to name a few such as business planning, human resource management, and financial planning, to operate businesses and enterprises.

Mrs. NGOUN Chankannika
Management Alumni
